

# NASA Travel Poster

Objective // To create a travel poster depicting what your moon would look like if you could travel there highlighting its unique characteristics.

Method // Google Draw or Paper poster

Research // To depict a moon's uniqueness you will need to research the planet to find the following information: <https://solarsystem.nasa.gov/kids/index.cfm#>  
[http://www.windows2universe.org/our\\_solar\\_system/moons\\_table.html](http://www.windows2universe.org/our_solar_system/moons_table.html)

<b>Name of moon</b>	
<b>Composition</b>	
<b>Parent planet</b>	
<b>Distance from parent planet</b>	
<b>Size // diameter and mass</b>	
<b>Topography ~ surface features</b>	
<b>Atmospheric gases</b>	
<b>Rotation &amp; Revolution period</b>	
<b>Unique facts about the moon</b>	
<b>Discovery/Name origin</b>	

Conclusion // Explain the design of your moon poster (why does it look the way it does; color, style, features, background elements?).
